

flu protection available now

Flu vaccination

You may already be aware of this service available at The Diagnostic Clinic but we would like to remind you that the flu season is fast approaching and we are now offering your company the opportunity to pre-book flu vaccinations for all your employees.

Flu is one of the most common reasons for short-term absence from employment, and symptoms can last for more than a week depending on the severity. Employees can miss even more work days when members of their family are affected by flu.

The Diagnostic Clinic is offering a personalised medical service for your company this flu season. The Diagnostic Clinic's mobile medical clinic can attend at your office with one of our highly qualified nurses and vaccinate your employees, without the standard call-out charge. This service will dramatically reduce an employee's time away from work required for a vaccination and also protect your work force during this year's flu season.

Call us today to book your company's personalised onsite flu clinic. Alternatively, your employees are free to visit The Diagnostic Clinic on Monday-Friday by booking an appointment on 0207 009 4650.

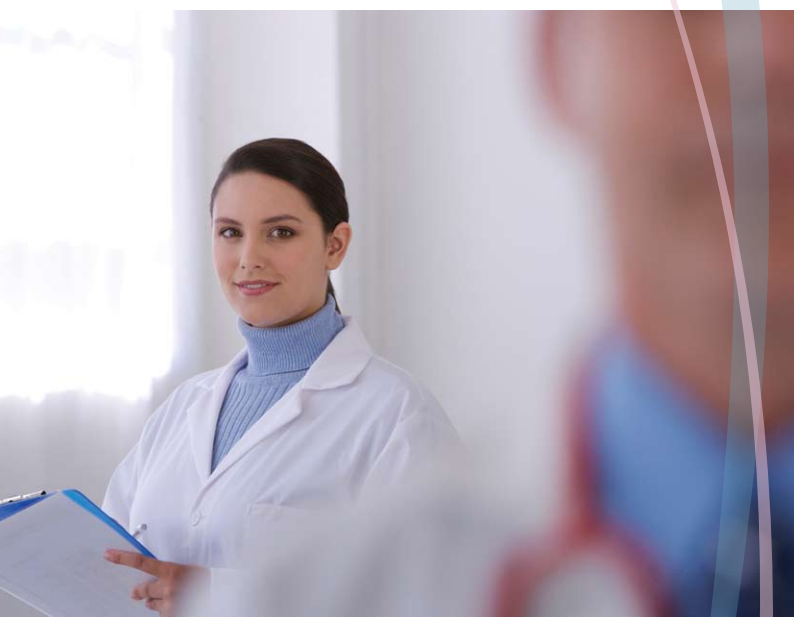

We also have six centres conveniently located in the West End and the City including Canary Wharf - appointments are necessary at these locations. If you would like more information about our flu vaccination programme, please call 07789 696233 or 0207 009 4650 alternatively email sales@thediagnosticclinic.com
