### **The Diagnostic Clinic introduces a vaccination alternative to the Flu Jab**

**The Diagnostic Clinic** in London's New Cavendish Street, the UK's premier centre for Integrated Medicine, offers a vaccination alternative for private and corporate patients not wishing to have the Flu or Swine Flu jab.

Many people have concerns regarding vaccinations. Whether this is as simple as needle phobia or concerns over the safety of vaccinations, an alternative can be considered. This is in addition to the conventional vaccination services that are available from **The Diagnostic Clinic**, offering patients a wider range of choice.

Whilst not conferring immunity in the same way that a vaccine can, the stimulation of the anti-viral part of the immune system can be done using natural components known to protect and treat viral infections such as influenza or Swine Flu.

The combination of Vitamins C and D with the minerals selenium, zinc and silver in Natural Food State form has scientifically validated evidence of efficacy.

TDC's unique Immune System Formula is created using the vital component Co-enzyme Q10 and the white cell immune stimulant plant extract Beta glucans.

This encapsulated supplement can be taken whether you choose to have the vaccination or not on a daily basis through this pandemic and generally through the flu season without concern of side-effects or interaction with any medication you might be taking.
